JOURNAL OF ELECTROANALYTICAL CHEMISTRY

# Subject index

Adsorbed carbon monoxide
The role of surface crystalline heterogeneities in the electrooxidation of carbon monoxide adsorbed on Rh(111) electrodes in sulphuric acid solutions (Gómez et al.) 1
Adsorption
The study of adsorption and reorientation of quinoline at mercury electrodes by measuring differential capacity–potential and differential capacity–time curves (Sawamoto) 153

Benzaldehyde
Solving the interference due to coupled reactions in the polarographic determination of benzaldehyde with soft modelling (Herrero, Cruz Ortiz) 223

Carbon-fluorine bond
Reduction of fluoroalkoxyarenes (Combellas et al.) 181
Carbon-fluorine cleavage
Reduction of fluoroalkoxyarenes (Combellas et al.) 181
Chaos
Potential oscillations during the reduction of $Fe(CN)_6^{3-}$ ions with convection feedback (Li et al.) 111
Chlorine
Hydrodynamic modulation using vibrating electrodes: Application to electroanalysis (Williams et al.) 159
CO electrodesorption
The role of surface crystalline heterogeneities in the electrooxidation of carbon monoxide adsorbed on Rh(111) electrodes in sulphuric acid solutions (Gómez et al.) 1
Comproportionation
The effect of ferrocyanide on the performance of heptyl viologen-based electrochromic display devices (Monk) 175
Convection feedback
Potential oscillations during the reduction of $Fe(CN)_6^{3-}$ ions with convection feedback (Li et al.) 111
Coupled reactions
Solving the interference due to coupled reactions in the polarographic determination of benzaldehyde with soft modelling (Herrero, Cruz Ortiz) 223
Crystalline surface defects
The role of surface crystalline heterogeneities in the electrooxidation of carbon monoxide adsorbed on Rh(111) electrodes in sulphuric acid solutions (Gómez et al.) 1

Dielectric friction
Dielectric friction at the boundary between two dielectric media (Girault, Kuznetsov) 19
Differential capacity
The study of adsorption and reorientation of quinoline at mercury electrodes by measuring differential capacity–potential and differential capacity–time curves (Sawamoto) 153
Dimerization
Solving the interference due to coupled reactions in the polarographic determination of benzaldehyde with soft modelling (Herrero, Cruz Ortiz) 223
Disposable electrode
Hydrodynamic modulation using vibrating electrodes: Application to electroanalysis (Williams et al.) 159
D-sorbitol
Electrosorption of D-sorbitol on Pt(110) and Pt(111) electrodes in acid medium: a study by programmed potential voltammetry (Proença et al.) 193

Electrocatalytic oxidation
Electrosorption of D-sorbitol on Pt(110) and Pt(111) electrodes in acid medium: a study by programmed potential voltammetry (Proença et al.) 193
Electrocatalytic oxidation of D-sorbitol on platinum in acid medium: analysis of the reaction products (Proença et al.) 237
Electrochemical impedance
Deviation from the polarization resistance due to non-linearity. I – theoretical formulation (Diard et al.) 27
Deviation of the polarization resistance due to non-linearity. II. Application to electrochemical reactions (Diard et al.) 41
Deviation of the polarization resistance due to non-linearity. III— Polarization resistance determination from non-linear impedance measurements (Diard et al.) 53
Electrochemical parameters
Linear analysis of steady-state $E_q$, $E_qC$ and $E_qC'$ voltammograms (Fang, Chen) 171
Electrochromic display
The effect of ferrocyanide on the performance of heptyl viologen-based electrochromic display devices (Monk) 175
Electrolysis
Electrocatalytic oxidation of D-sorbitol on platinum in acid medium: analysis of the reaction products (Proença et al.) 237
Electron mediation
The effect of ferrocyanide on the performance of heptyl viologen-based electrochromic display devices (Monk) 175
Electrosorption
Electrosorption of D-sorbitol on Pt(110) and Pt(111) electrodes in acid medium: a study by programmed potential voltammetry (Proença et al.) 193
Enzyme-catalyzed reaction kinetics
Bioelectrochemical responses of the polyaniline horseradish peroxidase electrodes (Yang, Mu) 71

$Fe(CN)_6^{3-}$ reduction
Potential oscillations during the reduction of $Fe(CN)_6^{3-}$ ions with convection feedback (Li et al.) 111
Ferrocyanide
The effect of ferrocyanide on the performance of heptyl viologen-based electrochromic display devices (Monk) 175
Flow injection
The study of adsorption and reorientation of quinoline at mercury electrodes by measuring differential capacity–potential and differential capacity–time curves (Sawamoto) 153
Fluoroalkoxyarenes
Reduction of fluoroalkoxyarenes (Combellas et al.) 181

Fuel cell
Mathematical modelling of the MCFC cathode. On the linear polarisation of the NiΘ cathode (Fontes et al.) 121

Gas diffusion electrodes
Mathematical modelling of the MCFC cathode. On the linear polarisation of the NiO cathode (Fontes et al.) 121
Glassy carbon electrode
Bioelectrochemical responses of the polyaniline horseradish peroxidase electrodes (Yang, Mu) 71

Heptyl viologen
The effect of ferrocyanide on the performance of heptyl viologen-based electrochromic display devices (Monk) 175
Horseradish peroxidase
Bioelectrochemical responses of the polyaniline horseradish peroxidase electrodes (Yang, Mu) 71

Immobilized on polyaniline
Bioelectrochemical responses of the polyaniline horseradish peroxidase electrodes (Yang, Mu) 71

Kinetics
Reduction of fluoroalkoxyarenes (Combellas et al.) 181

Linear analysis
Linear analysis of steady-state $E_q$, $E_qC$ and $E_qC'$ voltammograms (Fang, Chen) 171
Liquid ammonia
Reduction of fluoroalkoxyarenes (Combellas et al.) 181

Mathematical modelling
Mathematical modelling of the MCFC cathode. On the linear polarisation of the NiO cathode (Fontes et al.) 121
MCFC
Mathematical modelling of the MCFC cathode. On the linear polarisation of the NiO cathode (Fontes et al.) 121
Mercury electrode
The study of adsorption and reorientation of quinoline at mercury electrodes by measuring differential capacity–potential and differential capacity–time curves (Sawamoto) 153
Microband
Hydrodynamic modulation using vibrating electrodes: Application to electroanalysis (Williams et al.) 159
Microelectrode
Hydrodynamic modulation using vibrating electrodes: Application to electroanalysis (Williams et al.) 159
Multivariate calibration
Solving the interference due to coupled reactions in the polarographic determination of benzaldehyde with soft modelling (Herrero, Cruz Ortiz) 223

Negative impedance
Potential oscillations during the reduction of $Fe(CN)_6^{3-}$ ions with convection feedback (Li et al.) 111
Non-linearity
Deviation from the polarization resistance due to non-linearity. I – theoretical formulation (Diard et al.) 27
Deviation of the polarization resistance due to non-linearity. II. Application to electrochemical reactions (Diard et al.) 41
Deviation of the polarization resistance due to non-linearity. III—Polarization resistance determination from non-linear impedance measurements (Diard et al.) 53

Oxygen reduction
Mathematical modelling of the MCFC cathode. On the linear polarisation of the NiO cathode (Fontes et al.) 121

Partial least squares regression
Solving the interference due to coupled reactions in the polarographic determination of benzaldehyde with soft modelling (Herrero, Cruz Ortiz) 223
Platinum
Electrocatalytic oxidation of D-sorbitol on platinum in acid medium: analysis of the reaction products (Proença et al.) 237
Platinum electrode
Bioelectrochemical responses of the polyaniline horseradish peroxidase electrodes (Yang, Mu) 71
Polarization resistance
Deviation from the polarization resistance due to non-linearity. I – theoretical formulation (Diard et al.) 27
Deviation of the polarization resistance due to non-linearity. II. Application to electrochemical reactions (Diard et al.) 41
Deviation of the polarization resistance due to non-linearity. III—Polarization resistance determination from non-linear impedance measurements (Diard et al.) 53
Polarography
Solving the interference due to coupled reactions in the polarographic determination of benzaldehyde with soft modelling (Herrero, Cruz Ortiz) 223
Potential oscillations
Potential oscillations during the reduction of $Fe(CN)_6^{3-}$ ions with convection feedback (Li et al.) 111
Pt(110)
Electrosorption of D-sorbitol on Pt(110) and Pt(111) electrodes in acid medium: a study by programmed potential voltammetry (Proença et al.) 193
Pt(111)
Electrosorption of D-sorbitol on Pt(110) and Pt(111) electrodes in acid medium: a study by programmed potential voltammetry (Proença et al.) 193

Quasi-reversible steady-state voltammogram
Linear analysis of steady-state $E_q$, $E_qC$ and $E_qC'$ voltammograms (Fang, Chen) 171
Quinoline
The study of adsorption and reorientation of quinoline at mercury electrodes by measuring differential capacity–potential and differential capacity–time curves (Sawamoto) 153

Reaction mechanisms
Electrocatalytic oxidation of D-sorbitol on platinum in acid medium: analysis of the reaction products (Proença et al.) 237
Rh(111)
The role of surface crystalline heterogeneities in the electrooxidation of carbon monoxide adsorbed on Rh(111) electrodes in sulphuric acid solutions (Gómez et al.) 1
Rh(554)
The role of surface crystalline heterogeneities in the electrooxidation of carbon monoxide adsorbed on Rh(111) electrodes in sulphuric acid solutions (Gómez et al.) 1
Rhodium
The role of surface crystalline heterogeneities in the electrooxidation of carbon monoxide adsorbed on Rh(111) electrodes in sulphuric acid solutions (Gómez et al.) 1

Screen printing
Hydrodynamic modulation using vibrating electrodes: Application to electroanalysis (Williams et al.) 159
D-Sorbitol
Electrocatalytic oxidation of D-sorbitol on platinum in acid medium: analysis of the reaction products (Proença et al.) 237

Vibration
Hydrodynamic modulation using vibrating electrodes: Application to electroanalysis (Williams et al.) 159

Write–erase efficiency
The effect of ferrocyanide on the performance of heptyl viologen-based electrochromic display devices (Monk) 175
